(54) AUTOMATIC CASH HANDLING MACHINE

(57)Abstract:

PURPOSE: To save troublesome handling by customers, to prevent cash form being left behind, and to facilitate the transaction operation considerably by providing one money receiving paying box, a coin and paper money selection mechanism, respective feed paths, a coin transaction mechanism and a paper money transaction mechanism to the machine.

CONSTITUTION: When a user instructs the machine for 'deposit' at a money receiving/ paying opening 2, a shutter opens and the user throws in paper money and coins altogether. A selection mechanism 5 receives them at its comb-teeth bottom plate and vibrates the plate. Then, the coins are filtered and dropped between the comb-teeth and guided to a coin transaction mechanism 3 through a coin receiving and carrying path 7. On the other hand, the paper money left on the bottom plate is guided to a paper money handling mechanism 3 through a paper money receiving and carrying path 6. When the user instructs the machine for 'payment', paper money carried to a paper money paying and carrying path 8 from the mechanism 3 is received by the money receiving/paying opening 2, coins are sent to a coin payment and carrying path 9 from the mechanism 3 and sent to the money receiving/paying opening 2 via a guide and stored in the money receiving/paying opening 2 with the paper money altogether. Then, the shutter is open to allow the customer to receive the paper money and the coins altogether.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
